

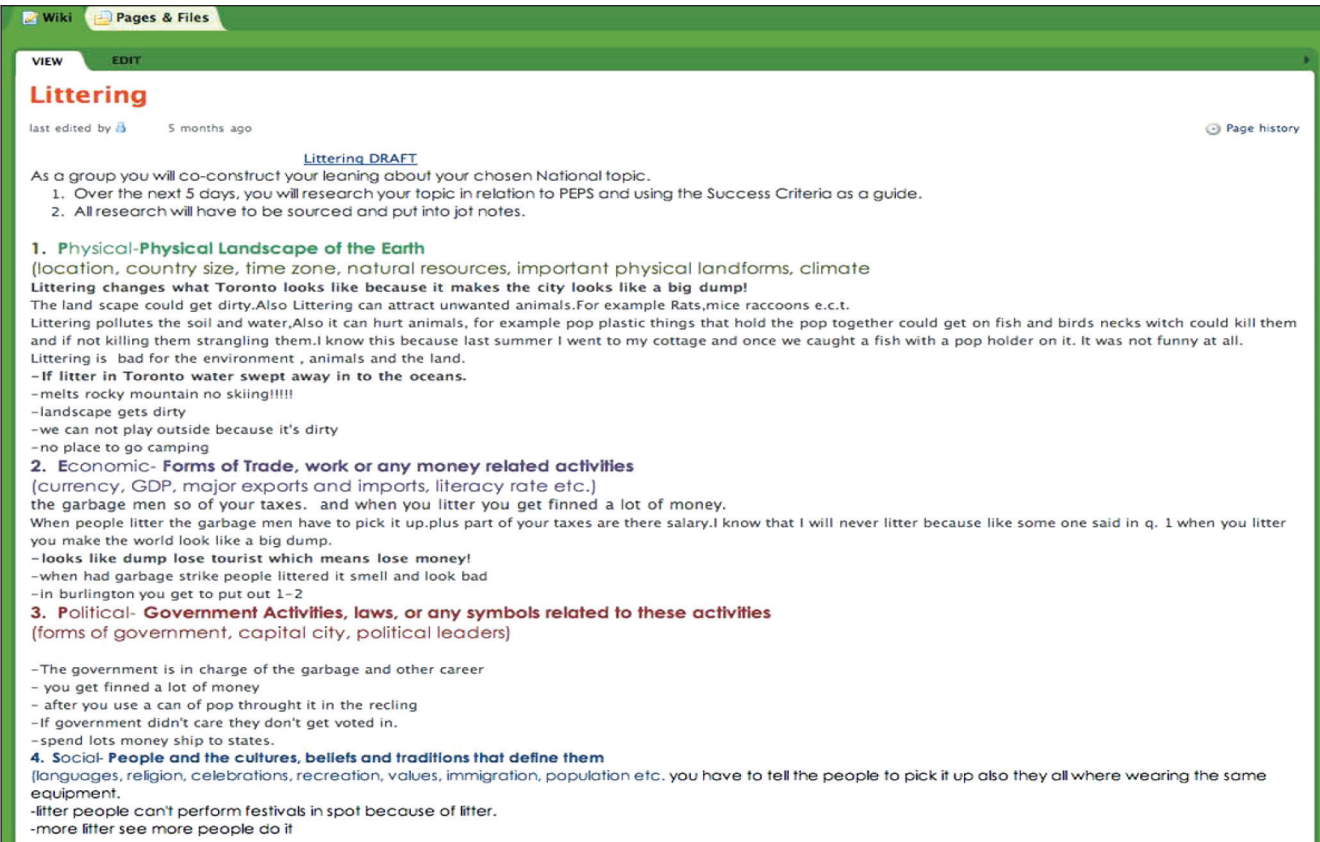

Figure 1 Screen shot from the student social studies wiki

The screenshot shows a web browser window with a green header bar. On the left, there are tabs for 'Wiki' and 'Pages & Files'. Below the header, there are 'VIEW' and 'EDIT' buttons. The main content area has a title 'Littering' in red. Below the title, it says 'last edited by [user icon] 5 months ago' and a 'Page history' link. The text of the page is a draft for a group project. It starts with 'As a group you will co-construct your leaning about your chosen National topic.' followed by two numbered instructions. Then, it lists four categories: 1. Physical-Physical Landscape of the Earth, 2. Economic- Forms of Trade, work or any money related activities, 3. Political- Government Activities, laws, or any symbols related to these activities, and 4. Social- People and the cultures, beliefs and traditions that define them. Each category has several bullet points of notes.

## Littering

last edited by [user icon] 5 months ago Page history

[Littering DRAFT](#)

As a group you will co-construct your leaning about your chosen National topic.

1. Over the next 5 days, you will research your topic in relation to PEPS and using the Success Criteria as a guide.
2. All research will have to be sourced and put into jot notes.

**1. Physical-Physical Landscape of the Earth**  
(location, country size, time zone, natural resources, important physical landforms, climate)

**Littering changes what Toronto looks like because it makes the city look like a big dump!**

The land scape could get dirty.Also Littering can attract unwanted animals.For example Rats,mice raccoons e.c.t.  
Littering pollutes the soil and water,Also it can hurt animals, for example pop plastic things that hold the pop together could get on fish and birds necks witch could kill them and if not killing them strangling them.I know this because last summer I went to my cottage and once we caught a fish with a pop holder on it. It was not funny at all.  
Littering is bad for the environment , animals and the land.

**-If litter in Toronto water swept away in to the oceans.**

- melts rocky mountain no skiing!!!!
- landscape gets dirty
- we can not play outside because it's dirty
- no place to go camping

**2. Economic- Forms of Trade, work or any money related activities**  
(currency, GDP, major exports and imports, literacy rate etc.)

the garbage men so of your taxes. and when you litter you get finned a lot of money.  
When people litter the garbage men have to pick it up.plus part of your taxes are there salary.I know that I will never litter because like some one said in q. 1 when you litter you make the world look like a big dump.

- looks like dump lose tourist which means lose money!
- when had garbage strike people littered it smell and look bad
- in burlington you get to put out 1-2

**3. Political- Government Activities, laws, or any symbols related to these activities**  
(forms of government, capital city, political leaders)

- The government is in charge of the garbage and other career
- you get finned a lot of money
- after you use a can of pop throught it in the recling
- If government didn't care they don't get voted in.
- spend lots money ship to states.

**4. Social- People and the cultures, beliefs and traditions that define them**  
(languages, religion, celebrations, recreation, values, immigration, population etc. you have to tell the people to pick it up also they all where wearing the same equipment.

- litter people can't perform festivals in spot because of litter.
- more litter see more people do it
