

From The Book (Evidence)	From My Brain (Inferences—Questions—Connections)
“Guardians of the Grizzly”	<p> I am thinking that for some reason grizzly bears are in danger and people need to protect them. I wonder what poses the danger: man or nature? Since the picture shows the bear with no people around, I infer that either nature is the problem or nature is the answer. </p>
Chris Filardi	<p> I have never heard of Filardi, but I am thinking he is famous Does he work with bears? I noticed that the cover mentions “A scientist.” Maybe Filardi is the scientist. </p>
