

# Middle School Student Sound Off

*Ian Bresser, Grade 7  
Pierce Middle School*

The screenshot shows a game window with a black background. At the top, there is a question: "Did you have friends in elementary school that changed and you don't like them anymore? Guess how many students out of 20 said yes." Below the question is a vertical stack of five circles: the top one is white, the second is grey, the third is dark grey, the fourth is black, and the fifth is white. A white horizontal bar is positioned below the circles. At the bottom, there are two rows of colored dots representing ranges from 0 to 20. The first row has dots for 0-2 (red), 3-4 (orange), 5-6 (yellow), 7-8 (green), and 9-10 (cyan). The second row has dots for 11-12 (blue), 13-14 (purple), 15-16 (magenta), 17-18 (pink), and 19-20 (red).

**Instructions**

Use < and > to move the ball. Land on the colored dot to answer the question. Answer as many questions correct as possible.

**Notes and Credits**

The information gathered was taken entirely from students in my ELA class. All students were asked the same four questions and did not have to answer if they did not want to.
