

# Middle School Student Sound Off

*Sehr Hamid, Grade 8  
Chartiers Valley Middle School*

Grades in middle school, they hold much weight  
They show our progress, they evaluate  
We study our hearts out to do our best  
But keep in mind that they don't define the rest  
Middle school is a time to explore  
To learn and try new things we've never done before  
So while our grades matter for our futures, let us remember, that  
kindness, passion, and growth are also intertwined  
So we work hard and strive for success  
Just to remember, grades are just a part of the process  
To Embrace the journey, and enjoy the ride  
Middle school memories, let's let them be our guide
